

The CCREEE Strategic Plan introduces the CCREEE's core actions and objectives for the period 2019-2023.

Those actions are aligned with the CARICOM and CARICOM Member States' goals to increase the use of sustainable energy in the region and drive it through a more climate-resilient path without overlooking economic growth and social development.

Governance Structure

Under its governance structure, the CCREEE works closely with the CARICOM Energy Unit, and each part of the structure has defined responsibilities and tasks.

The main decision-making pieces of the structure are the EB, the TC and the Secretariat (based in Bridgetown). They work in close collaboration with National Focal Institutions, the Regional Universities Network, and a group of Thematic Hubs who address topics of particular interest for the energy market.

Strategic Programmes

The CCREEE proposes an initial list of seven Strategic Programmes to take forward, which are conceived to address barriers to the introduction and development of certain sustainable energy technologies and solutions, policy and regulatory frameworks, capacity, knowledge and data availability, awareness, availability of financing tools and mechanisms, as well as the promotion of innovative ideas and entrepreneurship.

THE CCREEE STRATEGIC PLAN 2019-2023 AND IMPLEMENTATION PLAN

The CCREEE Strategic Programmes for the CARICOM region

Knowledge Management and Transfer

To increase the knowledge base, data exchange and local capabilities to provide goods and services to the local sustainable energy market

Energy Access

To increase access to reliable, affordable, cleaner and sustainable electricity services and cooking solutions for the population

Sustainable Industry and Business

To reduce energy intensity and resource consumption with cleaner working practices and to be more socially and environmentally responsible

Sustainable Transport

To reduce the environmental impacts of transport, increase energy efficiency and reduce CO² emissions

Finance and Project Support

To address financial constraints and finance capacity / knowledge challenges impacting the development of sustainable energy projects

Climate Resilience

To contribute to increasing climate change resilience of the CARICOM countries

Sustainable Buildings

To increase energy / resources efficiency and transform the building sector into a sustainable, greener and climate-change resilient one
